DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, 16, and 19 are drawn to image processing for setting an extraction area from a projection, where the projection is determined from a deletion step, classified in class 382, subclass 199.
 - II. Claims 8-10, 17, and 20 are drawn to image processing for analyzing the density distribution of an image, to determine an extraction area, classified in class 382, subclass 206.
 - III. Claims 11-15, 18, and 21 are drawn to image processing for calculating an average pixel value of an image to utilize the shape as an area for extraction, classified in class 382, subclass 194.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as analyzing an image of a cervical vertebra. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be

separately usable. In the instant case, invention II has separate utility such as determining the density distribution of an image. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such determining the average pixel value of an image. See MPEP § 806.05(d).

Conclusion

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Joseph Rogusa on Wednesday, June 05, 2002, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
